

The decision-intelligence partner that brings experience into practice

Gradient AI delivers measurable results to our customers, including the top carriers, consultants, MGAs/MGUs, TPA's, Pooled Risk Groups, and PEO's. We enable them to make smarter, faster decisions across underwriting, claims, and risk management.

Why Gradient AI?

We meet you where you are

- Provide deep insurance expertise that fits your current processes without disruption
- Generate actionable guidance at every stage of your analytics journey
- Deliver structured insights across leadership, finance, and compliance teams

We make risk easy to understand

- Translate complex models into clear, plain language
- Provide meaningful risk scores so you know the why, not just the what.
- Empower your team with clear signals built on sound data, not black boxes or guesswork.

We make integration and implementation seamless

- Connect to your existing systems, data structures, and workflows
- Align with your team's day-to-day rhythm with fast onboarding and reliable scoring
- Embed consistent, repeatable lift across underwriting and claims.

We do well by doing right

- Enhance pricing precision that supports profitability and sustainable growth
- Surface hidden or emerging risks before they become costly surprises
- Deliver better outcomes for both your business and the people you cover

Solutions by line of business

Whether you need support for Group Health or Workers Comp solutions, we have the right insights for your business. One platform. Two lines of business. Real results.

Group Health

- Sharpen pricing and risk selection to grow without sacrificing margin
- Leverage condition and medication level factors that inform pricing strategy
- Gain member level insights to help manage population health and prevent unexpected cost
- Identify emerging risk early to responsibly adjust pricing or reserves

Workers Compensation

- Strengthen risk assessment and audit tools to yield competitive rates and healthy loss ratios
- Surface the right risks early for adjusters and nurses for timely management.
- Support worker recovery and reduce long-term claim costs with targeted interventions.
- Audit by class code to ensure pricing truly reflects your underlying risk exposure.
