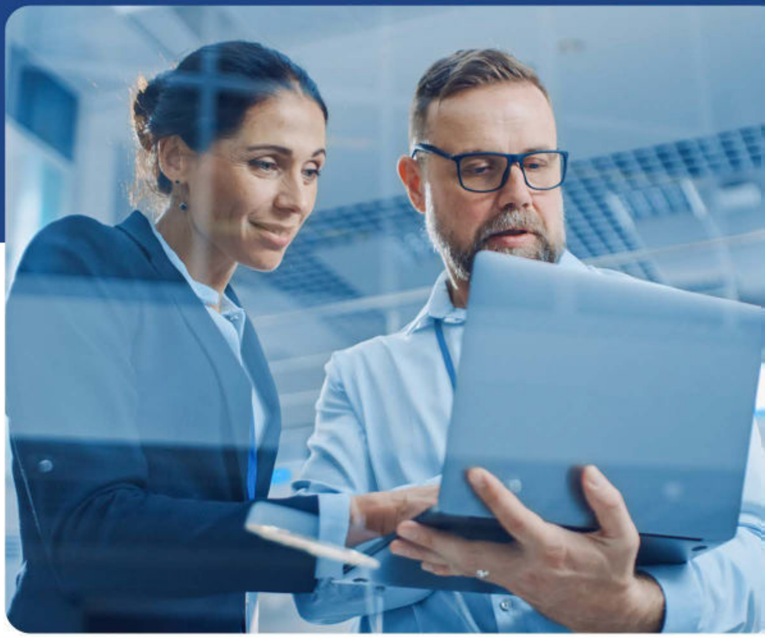
Workers’ Compensation Underwriting Solutions for PEOs

Speed, Accuracy, and Pricing Drive Success

Workers’ Comp underwriting is a fiercely competitive business in which speed, accuracy, and pricing drive success. To maintain a competitive advantage, PEOs must adapt to technological advancements, shifting market dynamics, and increasing customer expectations with a faster quote turnaround time.

What if you could harness the power of data and artificial intelligence to change the Workers’ Comp underwriting process completely? What if AI could help you get a more complete picture so that you could price more quickly and accurately?



Powerful AI-Based Assessment and Audit Capabilities Enable More Competitive Rates

The ability to accurately predict risk at a nuanced level makes all the difference. It enables you to identify good risks that others miss and price them to win, while avoiding bad risks or pricing them for a healthy loss ratio. Now you can acquire new clients by offering competitive pricing more quickly and profitably than ever before possible.

Gradient AI’s solutions enable powerful assessment and audit capabilities so you can keep your rates competitive while maintaining healthy loss ratios. They allow you to audit and verify class codes, ensuring that you’re pricing your business to accurately reflect risk. Gradient AI’s solutions augment your data and analytics so that you can transform data into decisions profitably.

Why Gradient AI’s Workers’ Comp Underwriting Solutions for PEOs?

- Price competively while maintaining healthy loss ratios; adjust pricing with greater confidence to maintain target loss ratios for your book of business
- Accurately predict underlying risk to allow for appropriately segmented applications
- Capture more business with faster quote turnaround times
